Brisbane, QLD

EXPERIENCE

- **Gilmour Space Technologies**
Avionics Engineer I - Brisbane, QLD
June 2026 - present
- **Ernst & Young (EY)**
Digital Engineering Technology Consultant - Brisbane, QLD
May 2024 - May 2026
- **Universal Field Robots (UFR)**
Undergraduate Robotics Engineer - Brisbane, QLD
July 2023 - Dec 2023
- **The University of Queensland (UQ)**
Mechatronics Engineering Tutor - Brisbane, QLD
Feb 2023 - Dec 2023
- **Santos**
Oil Subsurface Engineering Intern - Brisbane, QLD
Nov 2021 - Feb 2022

EDUCATION

- **Bachelor of Engineering (Honours) (Mechatronic)**
University of Queensland - 2019-2023

AWARDS & CERTIFICATIONS

- **ROS 2 Course Certification**
Udemy - 2025
- **Baseline Security Clearance**
- **Team Outstanding Performance and Design**
UQ Engineering - 2019
- **Dean's Award for Engineering**
QUT - 2018
- **1st in Engineering and Summa Cum Laude for Academic Excellence**
Somerset College - 2018

REFERENCES

- **Zachary Giofkou (Senior Software Developer)**
zachary.giofkou@yahoo.com.au
0422 293 700

SKILLS

- **Electronics & Hardware**
Electrical prototyping, troubleshooting and fault diagnosis, PCB design (Altium Designer), circuit analysis, soldering, mechanical assembly and 3D printing (Ulti-Maker Cura).
- **IT & Networking**
Windows / Servers / Linux / Networking fundamentals, Microsoft Azure fundamentals.
- **Languages and Programs**
Python, C++, MATLAB, GitHub, Microsoft Copilot, Autodesk Inventor, LaTeX.
- **Practices**
Technical documentation, verification & validation (V&V) testing, team collaboration.

PROJECTS

- **ECG Design and Prototype - UQ**
Designed, simulated, built and tested the electronics and processing for an ECG machine. Practiced electrical design, testing, analysis and signal processing.
LT spice, Electrical prototyping and troubleshooting
- **UFR Underground AutoPrep Robot - UFR**
Contributed to robotics software development for an autonomous underground mining robot, using Python and C++ in a Linux environment with ROS 2. Gained experience with mining-specific robotic applications, particularly path-planning in underground spaces, and collaborated in team-based project discussions and implementations.
ROS 2, C++, Python
- **Health Insurance Website - EY**
Worked as a full-stack developer on both the CMS and EAI team for a leading Australian health insurance provider. Built and maintained front-end and back-end features using Vue.js and C#, ensuring smooth user experience across member, consultant and public portals.
Vue.js JavaScript, C#, Agile project management
- **SLAM LiDAR Honours Thesis - UQ**
Proposed and implemented Doppler-SiMpLE, a scan-stitching algorithm that uses per-point Doppler velocity data from LiDAR sensors to improve localisation in geometrically-deficient environments like tunnels.
C++, LiDAR integration, Report writing
